Hiring Manager

Re: Application — Project / Portfolio Manager | Digital Transformation | Operations & Business Development | UAE–EU Markets

Dear Hiring Manager,

With over 10 **years of international experience** working exclusively with European companies across the **UAE, Italy, and global markets**, I am writing to express my strong interest in contributing as a **Project / Portfolio Manager** driving digital transformation, operations, and cross-border business development across UAE–EU markets. My career has been built at the intersection of strategic management, technology, and market expansion — and I am deeply passionate about bridging European companies into the Middle East.

Throughout my career, I have consistently delivered measurable impact: improving operational efficiency by **70%**, reducing project delivery timelines by **50%+**, and building complete digital ecosystems — from ERP implementation and IT infrastructure to web development and performance marketing — for multiple European ventures simultaneously. I currently manage a portfolio of investor-led companies under an **Italian investment group**, overseeing operations, digital transformation, and strategic growth across UAE and Italy.

A key recent example of my value: in early 2025, through **VALOR FZE** — my Dubai-based digital solutions company — I led a **UAE market entry engagement for an Italian food trading company**. This encompassed full market analysis, competitor benchmarking, buyer persona studies, pricing research, in-person B2B sales visits with UAE distributors and retail buyers, and delivery of a structured go-to-market roadmap adopted by the client. This is precisely the kind of **UAE–EU bridge work** I excel at — combining strategic insight with hands-on execution.

What I bring to your organisation:

- **End-to-end project & portfolio management** — from business setup and digital transformation to closure and transition, across multiple industries simultaneously
- **Cross-border operations expertise** — managing teams, vendors, and stakeholders across UAE, Italy, Asia, and Africa with full compliance and reporting rigour
- **Digital transformation leadership** — ERP (Odoo), IT infrastructure, web ecosystems, Power BI reporting, and AI-powered workflow automation
- **UAE–EU market development** — market entry strategy, B2B sales, brand positioning, and business growth for European companies in the Middle East
- **AI-enhanced productivity** — leveraging ChatGPT, Claude, Gemini, and automation tools to accelerate delivery and operational intelligence

I am a highly motivated, adaptable professional who thrives in fast-paced, multicultural environments — comfortable working at the **C-suite level** and equally effective on the ground managing execution. My combination of **technical depth, business acumen, and international network** across Europe and the Middle East makes me a uniquely positioned candidate for organisations looking to grow across these markets.

I would welcome the opportunity to discuss how my background aligns with your goals. I am available at your earliest convenience and happy to provide any further information.

Warm regards,

Abishai Sam
